WWW.ARMORSCREEN.COM

Armor Screen is the Original Patented Fabric Hurricane Protection that is Transparent, Lightweight, Easy to Deploy, and Unbelievably Strong. Armor Screen is custom made for each opening and is appropriate for commercial and residential applications. Armor Screen systems are appreciated by architects for freedom of design, and respected by engineers for unprecedented strength. Armor Screen systems are virtually maintenance free and typically utilize corrosion and UV resistant materials. Armor Screen has a reputation for designing and creating solutions for large and unusual openings while maintaining ease of deployment and high strength requirements. Armor Screen is recognized and approved by many historical boards and insurance carriers. Technical specifications and product approvals for all systems available upon request.

Roll-Up System

- High Velocity Hurricane Zone (HVHZ) Approved
- Florida Building Code Approved: FL8363
- Electric or Manual Operation
- Electric System can Interface with Home Automation Systems
